Re: Village wide network hardware replacement

The networking hardware used for communication between Village facilities, the internet and wireless access have reached end of life. This equipment is vital in providing security and communications for all Village staff. The current equipment has reached end of life by the manufacturer and will no longer be supported. Failure of this equipment would be detrimental and impact all employees and the citizens they serve.

Staff hired CCC Technologies Consultant Company to review and determine what equipment is necessary to continue providing service and security. The consultant company assisted in creating bid documents for hardware replacement. Staff was forthcoming with CCC Technologies indicating they were allowed to bid on the project, but no additional considerations would be giving to their bid over the other bidders. The bid was made public on August 2, 2019, and four bidders submitted bids. All bidders met the necessary requirements stated in the bid. The bid document consisted of hardware model numbers and quantities.

Staff reviewed the bids and recommends awarding the bid to the lowest bidder CCC Technologies in the amount of \$24,455.70. Staff budgeted \$50,000 for this project. In addition to the hardware replacement staff will also hire a consultant company to help implement the hardware. The implementation is part of a separate bidding document but part of the overall budgeted project.

Village of North Aurora Network Hardware Replacement bidders list 09/09/2019

Vendor	Price
CCC Technologies	\$24,455.70
Noor and Shah Corp.	\$31,377.48
Hypertec Direct	\$31,526.02
ExcalTech	\$32,920.37
