

Addendum #2

Section 3.4 has been modified as illustrated below

3.4 Project Schedule

Maintaining a project on schedule is critically important to the success of a project. Discuss strategies you have employed to maintain a project schedule. Discuss strategies you have employed to coordinate activities between project team members (Owner, AE, Civil Engineer, CM) and techniques you may have used to facilitate communication between team members. ~~Provide proposed schedule from date of award to completion of contract documents.~~ Provide a detailed project schedule from Bidding through the Construction Administration.
